

Fantozzi Attic Stairs

Scissor (SC30)

A pressed steel ladder with a zinc finish, has a telescopic handrail and safety attic rail, offering greater comfort for the user. The stair opens in a concertina fashion, making for easy use and compact storage. An easy-access locking latch on a plywood lid makes for a quality finish. Overall an easy to use stair which can fit in the tightest spaces, giving you greater choice up to 3000mm.

Wall Entry (WE30)

A great addition and one our customers have been asking us for. Now you can safely access that area behind the wall, the one you have always had to climb that unstable ladder to reach! Fantozzi offers quality and a solid build with an aluminium milled finish, which tucks neatly behind the wall when not in use. Pull on the latch and to open with ease.

Electric (ELC30)

A top of the range stair with a fully motorized action. This is the business! Hand rails to both sides, additional 'step off' step, safety attic rail and a remote control will provide maximum safety and comfort for the connoisseur who loves the finer things in life. A powder coated finish over a solid aluminium frame finish really makes this stand out, and did I mention that it was fully motorised.

Fantozzi Attic Stairs
