

Description

The Sellwood range of Pivotal Ladders - Aluminium (PLA) provide safe, easy access onto roofs, mezzanine floors and platform areas that are at height. The pivoting system at the top of the ladder allows for the ladder be pivoted from a 70° angle when in use to a 90° angle when not in use, creating clear space at the base of the ladder. The Sellwood PLA Ladders are custom designed, manufactured to suit each application and available in any height, up to 4m

Pivotal Ladder Range
